safety **in** *motion*™

Elevator car for panoramic application

PANORAMIC ELEVATORS

A panoramic elevator can thrill the passengers by providing them with fresh architectural perspectives, and riding in the elevator becomes the way to understand the original vision of the architect.

Tailor-made design

Wittur expertise in tailor-made elevator components design is at your disposal to help you find the best solutions finishes to realize your projects, in terms of choice of design, materials and components.

We provide, for those special elevator projects, panoramic cars designed according to international standards, to satisfy even the most demanding testing requirements.

This book is introducing examples of elevator solutions where the **panoramic car** design is considered an additional element of the building concept.

CAR LIFE CYCLE

CTH PROJECT

LONDON - UNITED KINGDOM

A distinctive red external elevator brings dynamism and acts as a focal interest point of the grey façade of the hotel.

MAHANAKHON PROJECT

BANGKOK - THAILAND

A large round Wittur panoramic car acts as the access point to Thailand's highest outdoor observation area, 314 meters above ground level at Mahanakhon.

RAILWAY STATION

LIÈGE-GUILLEMIN - BELGIUM

The round panoramic elevator follows the main concept of this contemporary railway station: the seamless communication and interaction between interior and exterior.

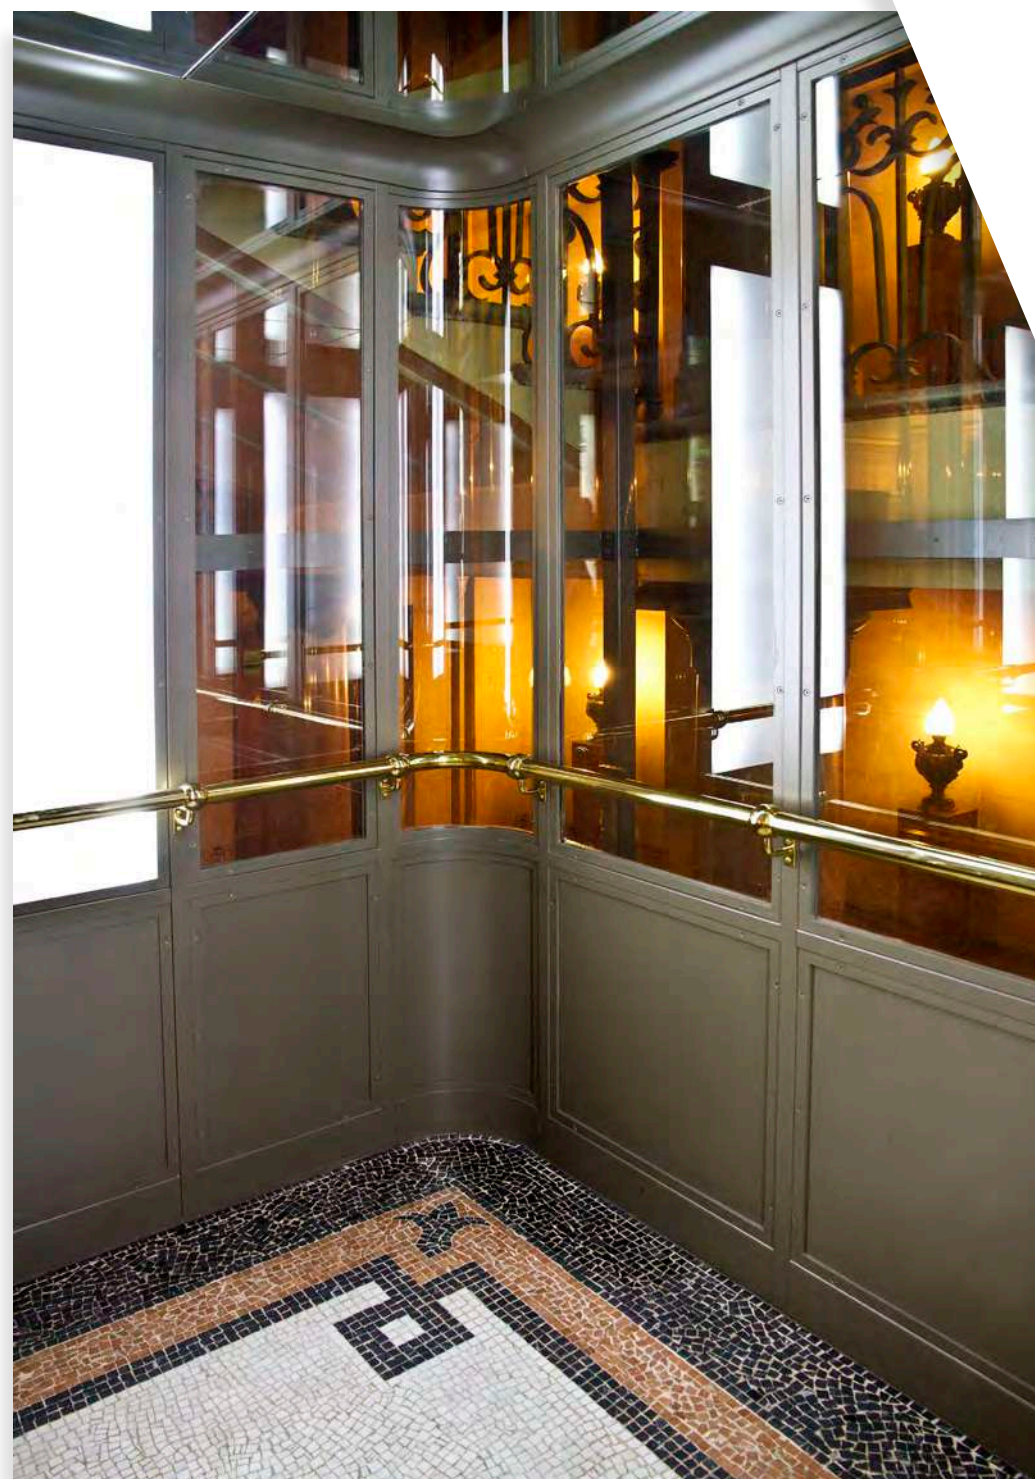

PALAIS GARNIER

PARIS - FRANCE

A state of the art new panoramic car that perfectly blends with the “Napoleon III” interior style of Palais Garnier, combining Baroque, classicism and Renaissance elements.

TAIKOO PLACE PROJECT

HONG-KONG - CHINA

An elevator designed with flat surfaces grouped in cubic arrangements combined with glass wall to provide a comfortable travel to passengers.

INTERLIFT

AUGSBURG - GERMANY

A futuristic car inspired by space technology combines glass and mirror finishes to enhance your riding experience.

JEWEL T1E BRIDGE PROJECT

SINGAPORE - SINGAPORE

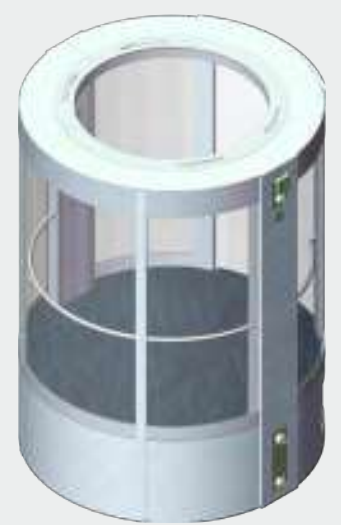

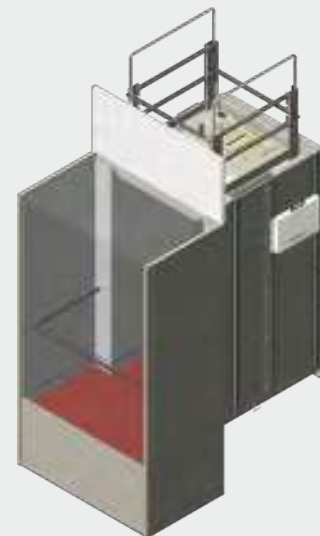

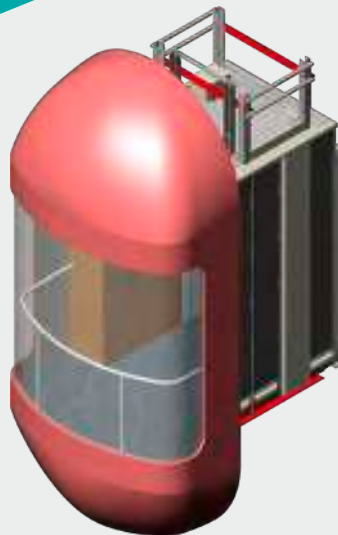

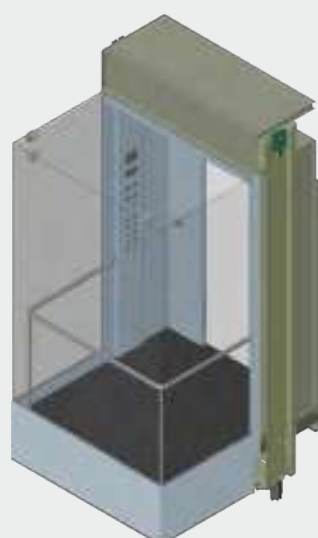

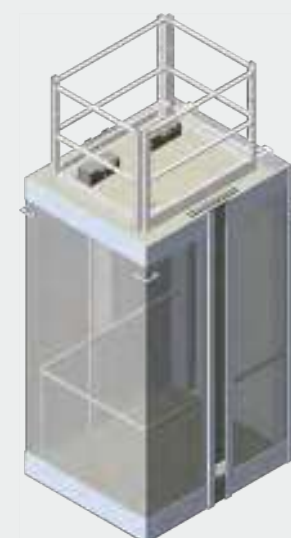

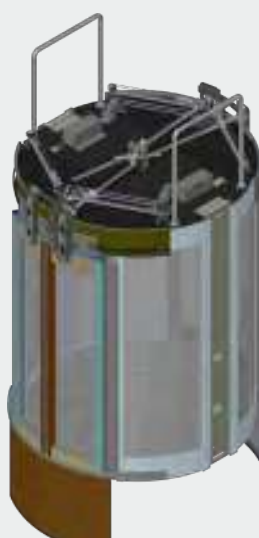

In the heart of the Singapore Airport Jewel extension, large square panoramic cars provide easy access and fast mobility to passenger in transit in one of the highest traffic airport in the world.
