

WITTUR PREVENTIVE MAINTENANCE

“Nobody knows Wittur equipment better than Wittur”

UPTIME

Wittur Preventive Maintenance helps you maximize uptime of your elevator, avoid unplanned breakdowns and costly emergency repairs. Prevention is always better than cure.

QUALITY

Wittur Preventive Maintenance ensures high quality performance of your Wittur equipment. For any elevator to work at its optimum, parts need to be replaced at the right time.

SMOOTH OPERATION

Wittur Preventive Maintenance simply makes your elevator run smoother. The use of Wittur Original Spare Parts helps you bring ride comfort back to the original level.

To insure your [Wittur product](#) is professionally serviced, follow the [Preventive Maintenance](#) instructions included in Wittur maintenance manuals as well as the Recommended Intervals for Part Replacement Check included in [Wittur spare parts catalogues](#). Use the only spare parts that are always guaranteed to carry the same quality and performance as the Wittur product itself – [Wittur Original Spare Parts](#).

All [Wittur Original Spare Parts](#) have been designed, tested and manufactured according to Wittur's detailed specifications, in order to optimally interact with all the parts and systems of your elevator. You trust in the longevity of your Wittur product - and you choose [Preventive Maintenance](#) and [Wittur Original Spare Parts](#) to support this longevity.

RECOMMENDED INTERVALS FOR PART REPLACEMENT CHECK

This recommendation is for the only purpose of providing additional non-binding guidance for the frequency of checks of specific product parts during preventive maintenance operations.

Maintenance of WITTUR products is to be provided only by qualified personnel and remains under the sole responsibility of the company providing it. This recommendation is in addition to guidance for regular maintenance of WITTUR products as laid out in the relevant maintenance manuals. This recommendation does not affect the warranty or any other terms and conditions under which WITTUR products have been sold.

Component name	Part number	Test/Tripping Speed Vt [m/s]	Max. Nr. of activations until recommended exchange of the complete safety gear
CSGB-01	904441	$0,0 < Vt \leq 1,0$	24
		$1,0 < Vt \leq 1,6$	15
		$1,6 < Vt < \text{Max (*)}$	10
CSGB-02	1010282	$0,0 < Vt \leq 1,0$	24
		$1,0 < Vt \leq 1,6$	15
		$1,6 < Vt \leq 2,0$	10
		$2,0 < Vt < \text{Max (*)}$	8
CSGB-03	1025328	$0,0 < Vt \leq 1,0$	25
		$1,0 < Vt \leq 1,6$	20
		$1,6 < Vt \leq 2,0$	15
		$2,0 < Vt \leq 3,0$	12
		$3,0 < Vt < \text{Max (*)}$	10

(*) Max Maximun Tripping Speed value depending on CSGB model, Guide Rail conditions and Norm applications
