

WITTUR's CORPORATE POLICY

Sustainability, Health, Safety, Environment and Quality Policy

Wittur Group is one of the leading manufacturers of components, modules and systems in the elevator industry.

Driven by the purpose of “**Advancing the Elevator Industry**”, Wittur’s team of experts work together with global and local partners to always deliver the best solution for any kind of elevator project and build the future of the industry ensuring whole life cycle of Wittur products.

By knowing everything about customers’ challenges and translating this expertise in practical solutions, by investing in technology and innovation, by working with a continuous improvement mindset in all areas of our organization, Wittur makes elevators work.

- Wittur is committed to a sustainability culture along its entire value chain: suppliers, partners, employees, customers and other stakeholders.
- Wittur is committed to protect People and the Environment by actively managing the impact of its activities on people health and safety, starting from its employees, the communities in which they operate, and on the environment as well as the subcontractors.
- Wittur aims to increase environmental and social positive impact of its operations, by setting “green” targets that drive decision-making every day and managing all environmental aspects related to its products along their entire life cycles.
- Wittur engages its supplier and strives to create a value delivering supply chain by focusing on sustainable product design and product improvement, encouraging more greener product use, green house gas reduction, making sure that all our partners use recyclable materials, reduce energy consumption, rely on renewable energy sources and materials, and comply with the highest health, environmental, safety and labour standards.
- Wittur complies with all legal, regulatory and other requirements as well as conforms to product liability, company’s policies & procedures and compliance with the applicable laws concerning pollutant emissions in the environment and health & safety guard during full life cycle covering product end of life.
- Wittur develops the Best People based on competence, awareness and motivation; involves the workforce and workers’ representatives where they exist, through training, participation, consultation and effective communication. Wittur provides training on the Management System requirements and communicates this policy to the entire organization and makes it available for all interested identified parts.
